# The offer

## **A bespoke service to map & analyse your university's research contribution to the SDGs.**

Our consultancy will provide:

- Thorough background of the importance of the SDGs to the HE sector
- Your research publications mapped against the SDGs between a time period of your choosing
- A comparison of your results to the UK and Global HE sector
- PNG graphics to easily visualise your results
- Powerpoint slides of your results to effectively communicate your results
- Excel file containing a list of your institutions publications for each of the 17 goals
- University affiliation list for each goal
- Citation count for each goal and your institution as a whole.

Prices: start at £2000

# Benefits

- Easily identify, metricise and communicate your organisation's research strengths (by publication)
- Assess the global sustainability impact of your research
- Assist with reporting, such as the SDG Accord and the THE University Impact Ranking
- Monitor the academic and strategic alignment of your sustainability values

# Testimonials

THE UNIVERSITY  
*of* EDINBURGH

*"We were very happy with the report"  
December 2019*

THE LONDON SCHOOL  
OF ECONOMICS AND  
POLITICAL SCIENCE ■

*"Really liking the report. Loving the fact  
that 'Gender Equality' looks good too  
which is going to go down a storm with  
our female Director!" - September 2019*

# Other requirements or questions?

We are happy to discuss mapping your other SDG contributions, such as teaching, operations and engagement activities. Please contact Asha Mistry (am1135@le.ac.uk) for more information.

Our research-backed methodology removes risk of 'greenwash' and strengthens your reporting and marketing.

The University of Leicester has developed a rigorous methodology to identify your organisations' positive global contribution to the UN Sustainable Development Goals. Our software generates a variety of attractive charts and simplified data for use within any communications, including comparison charts to the average UK University.

Our service allows you to measure improvements in your performance enabling you to highlight your strengths (externally) and areas for improvement (internally).

## The SDGs

The United Nations Sustainable Development Goals (SDGs) provide a blueprint to achieve a better and more sustainable future for all. Universities play an important part in achieving these goals, not only by researching but also by teaching the future generations how to deal with global issues.

**As the SDGs are globally recognised, identifying which SDGs are strongly supported within your institution can help to raise the academic and social profile of your institution.**
